## Abstract

Write a concise summary of the motivation, methods, main results, and conclusions.

**Keywords:** keyword one; keyword two; keyword three

## 1 Introduction

Introduce the research problem, explain its importance, and summarize the main contribution of the article.

## 2 Materials and Methods

Describe the geometry, numerical or experimental setup, boundary conditions, materials, mesh, solver settings, and validation strategy.

## 3 Results

Present the key findings. Refer to figures and tables using `\Cref{}`, for example ??.

Figure 1: Example figure placeholder. Replace it with an imported image from the `figures` directory.

## 4 Discussion

Interpret the results, compare them with the literature, and describe limitations of the study.

---

## **5 Conclusions**

Summarize the main conclusions and indicate possible future work.

## **Acknowledgements**

Add funding information, project acknowledgements, and technical support notes here.

## **Data Availability**

State where the data, code, or simulation cases supporting the article can be found.

## **Conflict of Interest**

The authors declare no conflict of interest.
